

# Mel Tillis, All I Ever Wanted To Do

You think you took her from me but I just gave her to you  
I never wanted her much anyway all I ever wanted to do  
Was kiss her lips in the early morn hold her hands while the babies were born  
Take her off hurt when she got sick get off from work and come home quick  
To be at home with her every night to love her for the rest of my life  
Give her anything her heart desired make sure that I never get too tired  
To let her know I love her so just let her go  
I never wanted her much anyway all I ever wanted to do  
Was ease her mind when she felt blue never never be untrue  
I never wanted her much you can see all I ever wanted to do  
Kiss her lips in the early morn...  
Oh was kiss her lips in the early morn...
