Melanie Fiona, Watch Me Work (ft. Sebastian Ver

Sick of ordinary days you wanna scream and shout Feeling like it's time to change, get a little wild Come up from behind the shade, be a rebel child Gonna raise some hell tonight Cause it's alright, don't have to be afraid There's a spotlight, that's shining just for you Go the distance, then show 'em what we're really made of

Watch me work, something different, something new Watch me work, out the box, out the blue Watch me work, something sexy, something fine Watch me work, out the box, blow your mind Watch me work

Set the status quo in place, let them other burn Show them that you're here to stay, tell them watch and learn Time to put the wheels in motion, never to return Get on with myself tonight

Cause it's alright, don't have to be afraid There's a spotlight, that's shining just for you Go the distance, then show 'em what we're really made of

Watch me work, something different, something new Watch me work, out the box, out the blue Watch me work, something sexy, something fine Watch me work, out the box, blow your mind Watch me work

Time to break free from these chains I'm on a mission, wanna live my life today I thought I told you, I'm taking over Talk is cheap so it's better if I showed you

Watch me work, something different, something new Watch me work, out the box, out the blue Watch me work, something sexy, something fine Watch me work, out the box, blow your mind Watch me work

Something different, something new Out the box, out the blue Something sexy, something fine Out the box, blow your mind Watch me work
