

# Melodyssey, Operate

OPERATE!!!

There right before my eyes  
Slowly we unfold  
I saw between you  
Slowly we unfold now

And in the end you gave me nothing, think about that  
I need respect upon the things that you made me do  
And in the end you showed me one thing, matter of fact  
I'll never trust another fuck that will make me choose

And you said no  
But you wanted me to see  
And I know it hurts  
You were everything to me

Come - come with me come with me  
Pain - give me the pain that I need  
Fall - fall with me fall with me  
Pain - slowing me down with the feed
