

# Mest, Without You

[CHORUS:]

I warned you I told you I'd be better without you  
But you didn't care you  
Told me I'd go nowhere if I didn't have you  
But where are you now

I haven't seen you around you know where to be found  
I wonder what happened to you  
All the insecurities built inside of you  
Must have just blown up

[VERSE:]

Thoughts of happiness  
Only when you reminisce  
Cause now that things are bad  
You think of what you could've had

Think of the years they spent  
With no money for the rent  
From the bottom to the top  
They stuck to their guns they'll never stop

[CHORUS:]

Cause I warned you I told you I'd be better without you  
I wonder what happened to you  
All the insecurities built inside of you  
Must have just blown up

[VERSE:]

Now everyone has changed  
But somehow you stayed the same  
A life lesson has been learned  
Your best came back and you got burned

What you done you try to hide  
It's time to swallow your pride  
You'll never change and I can see  
When you said at least you're makin money from me

[CHORUS:]

When I warned you I told you I'd be better without you  
But you didn't care you  
Told me I'd go nowhere if I didn't have you  
But where are you now

I haven't seen you around you know where to be found  
I wonder what happened to you  
All the insecurities built inside of you  
Must have just blown up

[BRIDGE:]

And I wonder where you are sometimes  
And I wonder are  
Right now

[CHORUS:]

I warned you I told you I'd be better without you  
But you didn't care you  
Told me I'd go nowhere if I didn't have you  
But where are you now

I haven't seen you around you know where to be found  
I wonder what happened to you  
All the insecurities built inside of you

How do you feel now

I warned you I told you I'd be better without you  
But you didn't care you  
Told me I'd go nowhere if I didn't have you  
But where are you now

I haven't seen you around you know where to be found  
I wonder what happened to you  
All the insecurities built inside of you  
Must have just blown up
