

# Michael Crawford, Nothing Like You've Ever Known

Nothing like you've ever known  
that's the life i thought that i was gonna show you  
you and i had just begun  
that's one happy ever after that i owe you

could have sworn we'd have made the perfect pair  
your heart was on fire when our dream was new  
mine was too

oh nothing like i've ever known  
i thought you would be my last, not just my first love  
we were both expecting more  
how i miss those early days of unrehearsed love

how did we ever let a moment pass?  
if i live a thousand years it still will be new to me

oh nothing like we'll ever know  
wonder where you are and what on earth you'll do there  
since then i've known many loves

but each time i close my eyes i still see you there....
