

# Michelle Wright, Find It In New York

You've been talking all night long about your problems  
You've been sleepless for a while  
Seems like everything in your life is so rotten  
You've forgotten how to smile

If you're not happy here with me  
Baby go ahead and leave, please

CHORUS:

Find it in New York, find it in the stars  
Find it in a rusty genie bottle or the back seat of a car  
Find it in your dreams, find it in a drug  
If you can't find it in my love  
Find it in New York

Maybe swim the ocean, leave the past behind you  
Change the color of your hair  
Take a journey to the Great Wall of China  
Maybe you will find it there

I know you're searching for yourself  
Looks like you need someone else  
And I can't help

CHORUS

You don't need me anymore  
So what are we still fighting for  
There's the door

CHORUS

Find it in New York  
Hope you find it  
Find it in New York
