Mick Jagger, Hang On Me Tonight

Like a picture you came into my life Like a picture the colours fade away Love is fragile, you hide it from the light It lasts forever and always stays the same Like a movie, you swept into my life And like a movie, the stars just fade away Hang on to me tonight Stay close to me all day Hang on to me tonight Stay close to me all day Ah, honey, while there's youth upon your face Ah, honey, are you tiring of the race My cards are on the table You can get up and walk away Or stay Like a movie, you swept into my life And like a movie, the stars just fade away All the characters are mouthing out their lines And the love scenes are shot in shades of grey Hang on to me tonight Stay close to me all day Hang on to me tonight Stay close to me all day Ah, baby, while there's youth upon your face Ah, baby, don't you lose that natural grace My cards are on the table You can get up and walk away Or stay Hang on to me tonight Stay close to me all day Hang on to me tonight Stay close to me all day
