Midnattsol, Desolation

I wonder how it feels to be loved I wonder how it is to be touched See all the others holding their hands And I'm still alone with myself

Say that you love me
Say that you care
I want you to love me
To kiss me and hug me
And I want you to never let go of me
(I want you to never let go)

Let it go, let it flow, let me feel free I never want you to go Let it go, let it flow, let me feel free I only want to be loved

I wonder what I have done wrong I wonder what I could have done Eyes are just staring Why can't you see I am who I am and no one else

Say that you love me
Say that you care
I want you to love me
To kiss me and hug me
And I want you to never let go of me
(I want you to never let go)

Let it go, let it flow, let me feel free I never want you to go Let it go, let it flow, let me feel free I only want to be loved

I wonder how it feels to be loved I wonder how it is to be touched See all the others holding their hands And I'm still alone with myself
