Miss Angie, Let's Get Together

Let's get together, let's be in love Let's get together, let's be in love always Our hearts beat the same beat The trees and plants as well I hope we're holding hands When we're caught in the air Blink, blink we're new Old is made new through and through Let's get together, let's be in love Let's get together, let's be in love always Roll out the carpet Bang those party drums Spin me around, I finally see the good one We get everything we wanted Everything we wanted, everything we wanted... I adore you I close my eyes, letting it all come soon Let's get together, let's be in love Let's get together, let's be in love always Always, always... Let's get together, let's be in love Let's get together, let's be in love always
