

# Miyavi, Real?

3, 2, 1, We're counting down let's turn it up the future is here  
You see those colorful connections for the colorless with no ideas  
I hear the blabbering... what the hell the noise is buzzing in my head  
Messed up with emoticons sayin' eee yeah

Ring ting zing now your virtual life is callin' you  
Those selfy's don't show us who you really are  
Got likes likes likes... yeah but how many people lovin' you?  
All the noise sounds just meaningless

Is this real?  
Groove on this the moment is now what you feel is real

The clones are out tonight and they are seriously dressed to kill  
Hey look the robot's gonna buy you drinks while testing out his sex appeal

You've got your strength in your hands everything is up to you  
And now It's time to hook it up on the floor  
Clap clap clap see that even the plastic hearts are pumpin'  
Now your heart starts dancing

This is real  
Groove on this the moment is now what you feel is real

Let the music take you higher  
Move on til' you're filled  
Scream out to the future louder  
Free to say what's real
