

MNEK, Don't Call This Love

Look at me with those eyes
Telling tales and sweet lullabies
I know I feel it, why deny it
I know the odds, I'll try and defy them
Take my hand, hold it to your heart
I submit, I crash, fall apart
I know the word but I won't say it
I won't say it

Call it the feeling you can't explain
Call it the thing that drives you insane
But don't call this, don't call this
Call it what keeps you up at night
Call it the wrong that feels so right
But don't call this, don't call this
Please don't call this love
Please don't call this love

Cause if I say it to you, I wanna mean it
Feeling strong and she's still my weakness
I know I feel it, why deny it
I know the odds, I'll try and defy them
Say my name and hypnotize
Play the game and soon realize
This is more than just a crush, just a crush

Call it the feeling you can't explain
Call it the thing that drives you insane
But don't call this, don't call
Call it what keeps you up at night
Call it the wrong that feels so right
Don't call this, don't call this
Please don't call this love

Cause I've fallen into that trap before
Cause you and I both know that this is more than company, sympathy
All I need is you by me
But I know how the story goes
Where the heart breaks before it grows

Call it the feeling you can't explain
Call it the thing that drives you insane
But don't call this, don't call this love
Call it what keeps you up at night
Call it the wrong that feels so right
But don't call this, please don't call this
Please don't call this love

Don't you dare
Don't you dare
Please don't call this love
Don't call this
Please don't call this love
