

# Mohair, Life

I took a trip to the other side  
Got as clean as the ocean  
Found a place to rest my head  
I got swallowed by the tide

Clear thoughts are making their way  
Out the door with emotion  
Can't recall what happened today  
Am I losing my mind?

You've got life  
Written all over your face  
Friendly fires  
Are burning all over the place  
All over the place  
We've been working so long now  
We've been trying so hard now

You've got life  
Written all over your face  
Friendly fires  
Are burning all over the place

You've got life  
Written all over your face  
Friendly fires  
Are burning all over the place

You've got life  
Written all over your face  
There's a light  
Shining all over the place

You've got life  
Written all over your face  
Friendly fires  
Are burning all over the place  
All over the place  
We've been working so long now  
We've been trying so hard now
