

# Mordor, The Colours of the Night

Have you ever seen the night so true dark like the night  
Have you ever seen its tints so true and unrepeteable  
Have you ever seen it frightening so black and misty  
Have you ever seen it cosy so blue till limpid  
Tonight is eclipse - eclipse of the moon - vision of the night  
You will see the darkness and feel the fear  
You will hear the silence and feel the fear  
Tomorrow is going to be full moon - full moon - vision of the night  
There are various colours of the night  
Which is the right one  
Is it alike black and white butterfly  
Is it alike colourful dream  
Dream is the colour of the night a brother of the morning  
A cradle of the night  
Is it the night or the day by my side  
Is it the reality or the dream by my side  
Reality is the colour of the day a sister of the evening  
A difficult of the life  
Have you ever lived the night so true and unrepeteable  
Have you ever lived it frightening so chaotic and dirty  
Have you ever lived it cosy so warm and starry
