

# Motley Crue, I Will Survive

The night will see the future  
Don't you know by now  
The long and lonely night,  
I finally see the light  
Like a demons dream, lights burning,  
love's not black and white  
And I'm still alive, and I will survive  
Yeah, come on baby  
I will survive  
Come on honey

I could see the future, it's just one dark cloud  
Let's leave it to the second dance,  
you won't keep me waitin' too long  
I can see the street light burning,  
love's not black and white  
And I'm still alive, and I will survive  
Well come on baby  
I will survive  
Yeah come on baby The winds are hints of trouble as the skies  
they turn to red  
Knock knock knock, heaven upside down  
As this devil takes his hand

Well I will survive  
Come on baby  
I will survive  
Come on honey  
I will survive  
I will survive  
Love's not black and, love's not black and,  
love's not black and white

I will survive.
