## Motorhead, Civil War

White noise is coming
The wolf at your door
Do you hear the drummin'?
Outside your window
Outside your window

Civil war, civil war All your yesterdays gone before Civil war, civil war Can you tell me what you're fighting for?

Soldiers of Fortune The traitor within Blood on the pale moon Outside your window, outside your window

Children learn to kill
Bet your ass you'll pay the bill
Season of the dog
The dollar takes the place of God

Death laughs in your face Anarchy will take your place You give all your children guns See what you have done Backlash coming soon Joker gonna call the tune

Your children are learning You teach them to hate Your cities are burning Outside your window Outside your window
