

# Must, Odyssey

I am a loner roaming my desire  
Chasing the sun beyond the grave  
My companions will be many  
Most will come and go  
Yes my fortune will be great  
And as I leave I can only smile  
For the eagle that carries my eye  
Sees death and evolution  
And in my prime I going to act as I am blessed

For only once will I live  
No I don't believe in any afterlife or coming back  
There so much I want to see and hold and understand  
For only once will I live

Somewhere along the way the dream started killing me  
A frozen heart in this city mind  
She fed me the earth I witnessed the flatline deviate  
Four billion years erupt inside

Now I feel like God God on a maniac peak  
I can hear the angels? violins weeping sweet  
And as I long for what he never found  
Yet another tongue slides down my stomach

And I will always love you deep inside  
Ikuisseste ihana  
But with you I simply slide  
And I can be like that, running
