

Mutya Buena, Love Story

Ooh

I'll cross the skies and the moon for everything
To show you how I'm dedicated to you, love
I will write your name in the winter nights
How can I explain, I want you to be mine

Don't be afraid to rely on me, to follow me
Saving you from what you thought would be, that's history
Wanna be with you tonight to show you how I feel
Coz you got me, I'm falling inside

Coz your love is my love
And oh-oooh babe
My heart is your heart
So take me away
We'll be forever
So baby, please stay
Take what you want
It's on me
My love story

I've never found that special one (that special one)
You know I've always
Wanted to be with you all of my life
I've never felt this way
And now you come around again
You seasoned up my day
And I feel close to you, baby

Don't be afraid to rely on me, follow me
Saving you from what you thought would be
Wanna be with you 'till I show you how
Coz you got me, I'm falling inside

Coz your love is my love
And oh-oooh babe
My heart is your heart
So take me away
We'll be forever
So baby, please stay
Take what you want
It's on me
My love story

The deepest seas I'll make across
It's like a hundred-thousand ways to make you mine
You got this special thing about you
I can't find (ooh)
Don't want nobody else
Coz I'm in love with you and always true
What's your intention?
Baby, say you love me too.

[Chorus x2]
