My Insanity, Supernatural Force

It's one o'clock in the night Doors make tremendous noise

This is the night of the night Come in our world of neverending might Follow odor of fire Come in our world of neverending might

You wake up - sweat on the forehead And think here was a real voice Strong wind blows through the cracks Of those old walls

Supernatural force will get you in a new life Animals are like - human - are like animals You'll try to escape from other creatures Devour or be devoured This is our only one law

You should know This is the end Nobody survives this ruin Here are all occupants of this house And they want to get you too
