

'N Sync, Baby you are not the only one

I see the things he does to you

All the pain he puts you through

I see whats really going on

Stayin out at night while your on the phone

Take it from me its a lesson to be learn even the good guys get burned

Take it from me I will give you love the kind of love you'd only dreamed of

Chorus:

Baby your not the only one

You dont have to be afraid to fall in love

I know that you heard in the past but if you want it here's my heart

No strings attached

He doesn't give you the kind of attention that a girl like you needs (that a girl like you needs)

He always looks around his eyes wonder around

He doesnt see you like I see yeah

Take it from me its a lesson to be learn even the good guys get burned

Take it from me baby I will give you love the kind of love you'd only dreamed of

Chorus

Take it from me its a lesson to be learn even the good guys get burned

Take it from me I will give you love the kind of love you have dreamed of

So if you wanna take a chance with me

If you take a chance I'll be everything you need becuase its our destiny

Chorus (2x)
