

'N Sync, Something Like You

So many times
I thought I held it in my hands
But just like grains of sand
Love slipped through my fingers

So many nights
I asked the Lord above
Please make me lucky enough
To find a love that lingers

Something keeps telling me
You could be my answered prayer
You must be heaven sent
I swear

(Chorus)
Cause something happens when you look at me
I forget to speak
Something happens when you kiss my mouth
My knees get so weak
Could it be true this is what God has meant for me
Cause baby I can't believe that something like you
Could happen to me

(something like you...ooh ooh)

Girl in your eyes
I feel your fire burn (feel your fire burn)
All your secrets I will learn
Even if it takes forever

With you by my side
I can do anything (can do anything)
I don't care what tomorrow brings
As long as we're together

My heart is telling me
That you could be my meant to be
I know it more each time
We touch cause...

(Chorus)

Something magical (something magical)
Something spiritual (something spiritual)
Something stronger than the two of us alone (yeah)
Something physical
Something undeniable
Nothing like anything (anything)
That I've ever known

(Chorus)
