

Nadia Gifford, See You Later

Feels like I've known you for so long, but there's always something wrong
I could never understand, what this feeling was
Searching for its meaning, I went through everything
Every piece of shattered glass, and then I realized

When I saw you, for the first time
Washed up on the shore and lost
I knew that I, had found someone I could call my own

And from then on, nothing could stop us
The friendship we had, I will never trade for anything
And from here on, we will always shine as one
We are stronger, stronger than the brightest star out there!

It's because I know that I can reach to you anytime
So at the end of the day; "See you later..."

When you told me you were gonna to have, to leave to a new land
I was devastated, beyond words could describe
After many sleepless nights, I had a revelation
If we couldn't last through this, then where had our friendship end?

No distance that may stand between us, can do any harm to us
As long as I know, that you'll always be there for me

So from now on, you may be far away
But we will live long, we will find each other once again
It will be an, easy ride for us too
Just remember: I will always be there for you

No matter how far, no matter the pain
It's not a "Good-bye"

So why not I just say; "See you later..."

I will never, dare imagine what it would feel like
If I didn't know that I would see you once again

I will never, use the phrase "Good-bye";
Because it will be, like any other day for us
And from here on, we will always shine as one
Just remember: I will always there for you

Just tomorrow is gonna be a bit further away
So why not I just say; "See you later..."
