

Nadia, Live On Love

Lovin' livin'
I wanna live on

I will live on love till my love is free
Till I reach the top baby you will see
Make my body move till I never stop
Take me on the groove all around the clock
Till I break it down everybody come on
I got it going on keep it up strong
Get up all around move it to the sound
Move it to the sound when my love comes down

I want to live, I want to love
I want to live on live on livin' on love
I got to give I got to love
I want to live on love
So live, so love so livin' on love
So live to live while livin' on love
So live, so love so live on love

So live to live while livin' on love

Lovin' livin' live on love
Live and love I will live on
Something we share in the heat of the night
Sometimes passion
Something we share in the heat of the night
Sometimes passion comes from the power of
Love, live on love

Gotta keep it up if you show me how
If you wanna go baby don't stop now
Gotta get it on cause I like you so
If you wanna get down baby let me know
Get up in the light when you step it on
Come on feel the night baby let's move on
Let you body freak move it to the beat
Move it to the beat can you feel the heat
