

# Naglfar, Plutonium Reveries

Oh glorious father I call upon  
Your blinding winds  
Engulf this world with your nuclear fire  
Come forth and end this charade  
This travesty known as humanity shant prevail  
The empty void is what I desire

Missiles shall fly  
Upon the black wings of destiny  
Brought forth by artillery  
Into the womb of mankind

[Chorus]  
Punishing fire I greet thee  
Come silence this world with your roar  
Plutonium reveries (Open damnations door)  
Punishing fire I greet thee  
Come silence this world with your roar  
Plutonium reveries (And Prayers of war)

Radiant demon come cleanse me with  
Your acid rain  
Pollute this earth with your poisonous breath  
Come forth and end this charade  
This travesty known as humanity shant prevail

[Repeat Chorus]

Missiles shall fly  
Upon the black wings of destiny  
Brought forth by artillery  
Erasing mankind

[Chorus]  
Punishing fire I greet thee  
Come silence this world with your roar  
Plutonium reveries (Open damnations door)  
Punishing fire I greet thee  
Come silence this world with your roar  
Plutonium reveries (And Prayers of war)
