

Natalie Imbruglia, Be With You

Don't you see the light has changed
and nothing looks the same
Just shadows in the ground
And if you listen hard enough you'll hear

That I don't wanna dream
If anything will change, and all I know
Is I don't wanna live, if I don't wanna be with you

Come in here I'll keep you safe
There's too much going on
Underneath the stars
And if I hold you close enough you'll feel

I don't wanna dream
If anything will change, and all I know
Is I don't wanna live, if I don't wanna be with you

I don't wanna hurt you
I don't wanna smile if you don't know
That I don't wanna live, if I don't wanna be with you

I just wanna be with you
Take it all and take our time
I want to see the world with you
I just want you by my side
If you don't mind

I don't wanna dream
If anything will change, and all I know
Is I don't wanna live, if I don't wanna be with you
