

Natasha Bedingfield, Hope

Remember morning always comes
As night surrenders to the sun
No matter how dark it may become
Don't stop your light from shining on
'Cause nothing's ever over till you say it's over
And nothing's ever finished
Not unless you walk away

You see I've got hope

I've got hope
So you could use a little, use a little
Leave it when you've done it
And I won't let go
'Cause with a little, with a little it can go a long way
I've got hope

It's easier to say you can't, when you know you can,
It's easier to let go, then to hold somebody's hand
But if you do, then you might just understand yeah
That it's ok. to not know where you're gonna end
'Cause nothing's ever over till you say it's over
And nothing's ever finished
Not unless you walk away

I've got hope
So you could use a little, use a little
Leave it when you've done it
And I won't let go
'Cause with a little, with a little it can go a long way
I've got hope
To you could use a little, use a little
Leave it when you've done it
And I won't let go
'Cause with a little, with a little it can go a long way

You need hope
I got hope

You see, I've got hope
So you could use a little, use a little
Leave it when you've done it
And I won't let go
'Cause with a little, with a little it can go a long way
I've got hope
So you could use a little, use a little
Leave it when you've done it
And I won't let go
'Cause with a little, with a little it can go a long way
I've got hope

Give me hope
I need a hand, I need a hand, I need a hand
