

Nazareth, Moondance

Light with the mornings goes
I live a long, forgotten shadow
Love with the morning goes
And what to do I just don't know
The moon is on the run
Another day to up and lay low
Maddogs and noonday sun
I need the darkness to show

Moondance.....Moondance

There goes a setting sun
That's when we turn from strobe to struttin'
Turn on the city lights
Cause you know I'm moody blue

Moondance....moondance

The women shadow box
They're dancing tough but the ice is melting
The music gives what it's got
The moon is looking at you

Moondance.....moondance.....moondance
