

Negative, Black Light

respect everyone around you
be social and clear your mind
protect yourself from a danger
just don't let all split(?) yourself
only you can decide for your life
you can make it, if you try
no one can't control for your mind
all you wanna see is black light
black light on your right
black light on your right

? if you need me
there and then i'm your side
respect everyone around us
i know i wanna take you so
only you can decide for your life
you can make it, if you try
no one can't control for your mind
only thing what I see is black light

only you can decide for your life
you can make it, if you try
no one can't control for your mind
only thing what I see is black light
black light on your right
