

# Nelson, Only A Moment Away

Come on over, now don't be shy  
All your stars and your planets are 'bout to align  
Why not surrender to the gleam in my eyes?  
Come and get it, before it dies

Afraid to take a chance  
Been victimized by circumstance  
Gather up your fears and let 'em go  
That's over now, that's over now

Chorus:  
I'll be your friend when you need one to turn to  
Call out my name and I'll always be there  
Wherever you go just remember I love you  
Whenever you start to feel the pain  
I'm only a moment away

Dust off the ashes and take my hand  
I will pull you away from the quick in the sand  
Tonight is the night we reach the promised land  
When you whisper that I'm your man

You're clinging to the past  
Scared to go too far too fast  
Nothing's gonna change 'till you let go  
I'll show you how, I'll show you how

Chorus

That's over now, that's over now  
Yeah!!

Chorus (X2)
