

# Neo Retros, We're Glad That You Came

Forces of good, make me feel numb  
Powdered-up messiahs go beat your drum  
It's making me deaf through channels, benign  
Panels of speakers desecrate my mind

"How do you feel"? a hologram said  
Better and better with the off switch pressed  
There's hopefuls in hordes, for now they're adored  
But hounded tomorrow, sing

It's lucky you came when you came  
And they knew you would come when you came  
And they're glad that you came when you came  
But nobody knows you by name

So when did it start and when will it end?  
Cos when you're the clique down here you must pretend  
The pap and the pop, the puppets all drop  
A blank manifesto leads the empty crocks

So learn to revise and learn to revere  
The leader among us is your friend your peer  
Forever the twain shall meet when the blind  
Deaf, dumb among us sing

It's lucky you came when you came  
And they knew you would come when you came  
And they're glad that you came when you came  
But nobody knows you by name
