

# Neon Jungle, Louder

Stepping outside my head  
I don't wanna hear what you said  
I don't wanna fall down flights of stairs  
Tripwires everywhere  
I'm climbing trying to get from under you  
If you ask me back I'll go, I need distraction  
So pull every pin from every grenade  
And blow it all up in my face

Make everything louder, do it till my skin vibrates  
Make everything louder, I wanna hear my eardrums break  
More volts in the system, drown out the symptoms  
Everything louder, louder  
I don't wanna listen, just wanna feel it  
Feel it louder, louder

Put me in a sound proof room  
A million miles from you  
My ears would still be bleeding, shots of noise  
Still seeping through  
I wish I couldn't hear you  
So pull every pin from every grenade  
And blow it all up in my face, boom

Make everything louder, do it till my skin vibrates  
Make everything louder, I wanna hear my eardrums break  
More volts in the system, drown out the symptoms  
Everything louder, louder  
I don't wanna listen, just wanna feel it  
Feel it louder, louder

And you got the power  
You got the power  
You know the words that work  
You know the words that work on me

You got the power  
You got the power  
You know the words that work  
You know the words that work on me

Make everything louder, do it till my skin vibrates  
Make everything louder, I wanna hear my eardrums break  
More volts in the system, drown out the symptoms  
Everything louder, louder  
I don't wanna listen, just wanna feel it  
Feel it louder, louder
