

# Nessa Barrett, decay

So it's me and you against the world  
And we won't make it out alive  
'Cause everyone wants to sink their teeth and stop our breathing, I  
I know we like to hurt each other  
Just to see if we can cry  
But I will never fucking leave you, cross my heart and hope to die

They say there's no chance in hell  
That this is gonna last

But I'll still love you even after we decay  
When our bodies start to wither  
And there's bugs inside our brains  
And I'll still want you when we're six feet in the ground  
When our bones are cold and rotten  
I promise I'll still be around

They're telling us our future is a dead end (Dead end)  
But fuck it, I'll be your corpse bride  
They're not invited to the wedding (You're not invited to the)  
I'm tracing all the tears that you'll be shedding (You'll be shedding)  
A finger rose at only party  
They won't use our names to get in

They say there's no chance in hell  
That this is gonna last

But I'll still love you even after we decay (After we decay)  
When our bodies start to wither  
And there's bugs inside our brains (Bugs inside our)  
And I'll still want you when we're six feet in the ground (Six feet)  
When our bones are cold and rotten  
I promise I'll still be around

(Even after we decay)  
Promise I'll still be around  
(Even after we decay)  
Promise I'll still be around  
(Even after we decay)  
(Even after, even after we decay)  
(Even after, even after we decay)
