

Netta, Everything

You could've been my everything
All I wanna do is give you everything
Baby stop the car, go back, I want everything
No you had to go and fuck up everything, everything

I'm sick of your trouble, I'm sick of your lies
I'm sick of you laughing whenever we fight
We try to be honest, you know that I try
I'm out of options and you're out of time

Feeling passive aggressive so I'm texting my exes
Tell me why am I surprised you didn't care?
Were you thinking about me in the threesome without me?
Yeah I'm talking to you, are you even there?

You could've been my everything
All I wanna do is give you everything
Baby stop the car, go back, I want everything
No you had to go and fuck up everything, everything
You could've been my everything
All I wanna do is give you everything
Baby stop the car, go back, I want everything
No you had to go and fuck up everything, everything

Oh my God, oh my God, don't let me walk away
Tell me once, tell me twice, don't let the fire fade
Oh my God, oh my God, you're giving me nothing
You're giving me nothing

Feeling passive aggressive so I'm texting my exes
Tell me why am I surprised you didn't care?
Were you thinking about me in the threesome without me?
Hey I'm talking to you, are you even there?

You could've been my everything
All I wanna do is give you everything
Baby stop the car, go back, I want everything
No you had to go and fuck up everything, everything
You could've been my everything
All I wanna do is give you everything
Baby stop the car, go back, I want everything
No you had to go and fuck up everything, everything

Stop, please, no
Give me everything I want
Don't get me wrong, I'm [?] don't mess with me baby
You know I'm a masterpiece baby
And you should be begging me baby, please

You could've been my everything
All I wanna do is give you everything
Baby stop the car, go back, I want everything
No you had to go and fuck up everything, everything
You could've been my everything
All I wanna do is give you everything
Baby stop the car, go back, I want everything (every single thing)
No you had to go and fuck up everything, everything
