

# Never Heard Of It, Situations

I can't believe situations  
Got you in such desperation now  
I know what kept you so far away  
I'll take a welcome vacation  
From all the problems you brought down  
I know what made you change that day

If there's anything we know right now  
Is that nothing's ever over  
All we really need to do right now  
Is stop and work this out

Sign me up on your application  
File under separation  
Have your bags packed  
Cause soon we've got a one way trip

If there's anything we know right now  
Is that nothing's ever over  
All we really need to do right now  
Is stop and work this out

And we fought so long  
If you're right then it makes me wrong  
All I know the chance is gone  
And if it hurts why do you hang on

I can't believe these situations  
Got you in desperation  
I can't believe these situations
