

Nevershoutnever, Loversloveliarlie

Take photographs, Take all your never fears.
We've got some packing to do, We've got some packing to do.
And my jaw aches, Repetation.
Take all your dreams, Take all that's left to see
Write it down, sign your name, go ahead and leave
There's nothing left to loose.

Oooooohh.

The clouds rip through the sky like dynamite
to my surprise it was a beautiful sight

With our hands open wide

And I can't hide the truth as well as you

Singing woah, Singing woah.

Take photographs, Take all your never fears.

We've got some packing to do, We've got some packing to do.

And my jaw aches, Repetation.

Take all your dreams, Take all that's left to see

Write it down, sign your name, go ahead and leave

There's nothing left to loose.

Oooooohh.

I've got all of these dreams

That no one cares to know about

Cares to dream about with me.

All these memories haunting me, Seeking control.
