

New Buffalo, While You're Away

While You're Away

I've got plans to take you down
Privately we'll make a time
Taking notes and making charts
One machine to map the heart

Silver lining in your mind
Look inside but never find
Hanging pictures on the wall
While you're thinking how you left all

While you're away
With stars in your eyes
The infection is so close to the heart
Give me some time
It's all that I need
You lie beside your dreams in the dark

Please pick up the phone
I picture you asleep
And you're alone
You're listening to the sound
Of your inside
It's never been so sweet or so alive

While you're away
With stars in your eyes
The infection is so close to the heart
Give me some time
It's all that I need
You lie beside your dreams in the dark

Give me some time
It's all that I need
Give me some time
It's all I need

Give me some time
It's all that I need
Give me some time
It's all that I need
Give me some time
It's all that I need
Give me some time
It's all that I need
