

# New Buffalo, While You're Away

While You're Away

I've got plans to take you down  
Privately we'll make a time  
Taking notes and making charts  
One machine to map the heart

Silver lining in your mind  
Look inside but never find  
Hanging pictures on the wall  
While you're thinking how you left all

While you're away  
With stars in your eyes  
The infection is so close to the heart  
Give me some time  
It's all that I need  
You lie beside your dreams in the dark

Please pick up the phone  
I picture you asleep  
And you're alone  
You're listening to the sound  
Of your inside  
It's never been so sweet or so alive

While you're away  
With stars in your eyes  
The infection is so close to the heart  
Give me some time  
It's all that I need  
You lie beside your dreams in the dark

Give me some time  
It's all that I need  
Give me some time  
It's all I need

Give me some time  
It's all that I need  
Give me some time  
It's all that I need  
Give me some time  
It's all that I need  
Give me some time  
It's all that I need
