

New Order, Dreams Never End

My promise could be your fiend
A given end to your dreams
A simple movement or rhyme
Could be the smallest of signs
We'll never know what they are or care
In it's escapable view
There's no escape so few in fear
Give in a changing value

To be given your sight
Hid in a long peaceful night
A nervous bride for your eyes
A fractured smile that soon dies
A love that's wrong from your life and soul
A savage mine had begun
Hello, farewell to your love and soul
Hello, farewell to your soul

Now I know what those hands would do
No looking back now, we're pushing through
We'll change these feelings, we'll taste and see
But never guess how the him would scream
But never guess how the him would scream
But never guess how the him would scream
