

New Order, Everything's Gone Green

Help me, somebody help me
I wonder where I am
I see my future before me
I'll hurt you when I can
It seems like I've been here before

Confusion sprung up from devotion
A halo that covers my eyes
It sprung from this first estrangement
No one have I ever despised
Is this the way that you wanted to pay
Won't you show me, please show me the way
Is this the way that you wanted to pay
Won't you show me, please show me the way
