

# Next, Brand New

Yo...

Let me start off by first apologizing...

Girl you think I take you for granted...

But um...

Im here to take it back...

(Chorus)

Can we

Pull back a minute and make believe  
that

I don't know you and you dont know me

Darling let's pretend

This old school love is brand new

Can we

Explore the places I've already been

Just

Tell me where and I'll kiss it again

Darling let's pretend

This old school love is brand new

I know I shouldn't have to ask

But it seems that I've relaxed

And I'm getting the feelings that

It's time I take it back

Remembering late night escapes

In the car callin out my name

You being scared when your friend was late

Then being cool when it finally came

Those were the days...

(chorus)

Way back when hickies were the thing

You wore bloomers, not that sexy g-string

And gettin blue balls was a daily thing

But it was alright, with me

To when that very first time went down

How you moaned when I went down

You were the one

I had no doubt

We need to get that back right now

Cause those were the days...

(chorus)

We're still here (yah)

Cause we conquered every feeling (every feeling)

The fire burns inside like yester year

My baby since back in the day

We knew it would be us

Holding on to that first crush

Had to say today, is what it was

So lets keep on sending, it's only beginning

((chorus) Repeat 2x)

Back...

Like Cadillacs and hubcaps

Back...

Like leavin letters in your nap sack

Back...

like Jellies and pro keds

Back to girl...

When we first met

Back...  
To when Mike had the glove on  
Back...  
To when our love was so strong  
Back...  
To the days I know you miss  
Ill give back , I promise this  
Take it back...

(chorus)
