

# Nick Jonas, Find You

I look for you in the center of the sun  
I took a pill but it didn't help me dumb  
I see your face even when my eyes are shut  
but I never really know just where to find you  
I taste the words that keep falling out your mouth  
you got a logic I can never figure out  
if I could hold you than I'd never put you down  
but I never really know just where to find you

where to find you /2x  
but I never really know just where to find you  
try /3x  
but  
try /3c  
but i  
but I never really know just where to find you

you think you know how to get under my skin  
it's ok. for now but it's never permanent  
knock on the door but there's no one listening  
and I never really know just where to find you  
you live for love but you never really tried  
you say it's not but it's always on your mind  
keep chasing gold but you're used to silver lines  
but I never really know just where to find you

where to find you /2x  
but I never really know just where to find you  
try /3x  
but  
try /3c  
but i  
but I never really know just where to find you

bad idea  
I'm chasing a feeling  
bad idea  
I don't even need it  
bad idea  
looking for me tonight, tonight

where to find you /2x  
but I never really know just where to find you  
try /3x  
but  
try /3c  
but i  
but I never really know just where to find you
