

Nina Hynes, Staros

You were always on my mind
I know I said that you should leave
I didn't mean a thing
I didn't say it from my heart
I said it from my most instinctive defensive part

So kiss me like this could be the last day
This could be the last time you hold me this way
So show me if I mean the world to you
So show me if I mean the world to you

Been living like a hurricane
Into my house, into my streets
It blew my city down
I know there's nobody to blame
Just something so fast could never last

So take it like this could be last day
This could be the last time you hold me this way
So show me if I mean the world to you
So show me if I mean the world to you

You're gone as gone as you have come
I said that you could be the one
And I meant everything
You know I said it from my heart
I said it from my most instinctive courageous part

I will take you with me when I go, when I go
