

Nina Nesbitt, Chewing Gum

Before you jump in
Trying get under my skin
Something I should let you know
It's gonna be impossible

Coz I've made a mess
In a backless dress
I don't wanna lead you on
Coz I'd only do you wrong,
You can have my heart

But you're not gonna leave with it
Lying in the dark
You almost believed in it

You've got me wrong
I've got you hanging round my neck
Saying romance isn't dead

You know that I'm down for whatever
But, I told you that it won't be forever
How come you still think that you're the one
Baby, I'm just chewing gum until the flavors' gone
I'm just chewing gum until the flavors' gone

I'm gonna tell you straight
I could be your worst mistake
Or you could get the best of me
Forget about the rest of me

With your cigarette
In between your teeth
You could light me up
If I forget to breathe

You can have my heart
But you're not gonna leave with it
Lying in the dark
You almost believed in it

Thought you were strong now
I've got you tied up in the bed
Screaming romance isn't dead

You know that I'm down for whatever
But, I told you that it won't be forever
How come you still think that you're the one
Baby, I'm just chewing gum until the flavors' gone
I'm just chewing gum until the flavors' gone
