No Angels, Ten Degrees (Vany's Song)

Was it love? Did it hurt? What was the feeling?
I really really don't know! I can't remember! Am I free?

I'm searching for the real words
But u left and nothing hurts, ha, ha, ha
I feel peaceful and so right
Gonna dance the whole night
I'm searching for a good song
Silence got me so damn wrong
Sing along, la la la la
Music makes me feel so strong

Got me off this hound, drunken by the sound
See what I have found, since I "ahhh" Without u
U never saw me shine, u were never mine
time passed all so fine, look at me, u will see
I am free

Ten degrees above the count
Hundred miles above the ground
Lady sun shines through my eyes
Ten degrees above the count
A hundred miles above the ground
I am flying high, without u, good-bye

I'm searching for a deep thought
Maybe for another fault
Quitt crying much too loud
Cause thats not what life's all about
I'm searching for emotion
Like the wildest ocean yeah
Does it get u right, or does it get u On the left hand side

Got me off this hound, drunken by the sound
See what I have found, since I "ahhh" Without u
U never saw me shine, u were never mine
time passed all so fine, look at me, u will see
I am free

Ten degrees above the count
Hundred miles above the ground
Lady sun shines through my eyes
Ten degrees above the count
A hundred miles above the ground
I am flying high, without u, good-bye

Dums dums dums, da da dum dum
Dums dums dums, does it get u right
Dums dums dums, or does it get u
Dums dums dums, on the left hand side
Do not play with the fire
U don't need to force me higher
I'm beggin for u to keep, to keep one eye
One eye, or two on me
U should free ur mind
I'm sure it takes a lot of time
Be brave, strong to see
Life's hard, but nice, if u feel me

I really really don't know
I can't remember

Ten degrees above the count
Hundred miles above the ground

Lady sun shines through my eyes
Ten degrees above the count
A hundred miles above the ground
I am flying high, without u, good-bye
