

No Doctors, Future Awaken Widen

Sweet love I can feel you
You're not so remote today
I search for the meaning
All I can throw away- I throw away

As I make my confession
I let you down again
Just one indiscretion
And I'm without a friend- without a friend

Won't you take it round the bend
I'd like to show you
The man that I hope to be
I would like to thank you
All that you do for me- you do for me

Future waken up
Future awaken wide
We don't care what fall down
Just give up that sweet sound

I got that feeling
The ceiling exists no more
And the sound that's revealing
Won't ever fear no more- can't fear no more

I know the score
It will guide us
The land that we hope to reach
It will give us a fable
A story I'm born to teach- all born to teach

Sweet future
Join our song
Let me ride you like a clopez wave
I feel it in my bones

All the underground noise
You try to chase around
The kids in high school
The one create the sound
And when you see us
In the E.R.P.
You know what
Don't need to be told
It is not made of gold

It's how we get down in East Rogers Park
I let the lights go dark

Om
Thea
Recharge
Divine me

Sweet love I can feel you
You're not so remote today
I search for the meaning
All I can throw away- I throw away
