

Noah Galvin, With the right music

Another school day
drab, yes. depressing? Yes.
But not if you got a little trick.
I know, that the walls can't get any gloomier.
I know, that the hallway can't stand to be roomier.
Although, that might be true
oh I know that that room can have more of a flair to it,
I know that the school can have more of an air to it
And so (so what'd you do?) I listen to the beat that's playing inside my head
Those magic lyrics that go unsaid
I hear that simple melody safe and warm
and then I... transform
With the right music, we're at the film premiere
so many stars it's hard not to stare
With the right music, even the Pope is here
Cameras flash, it's a smash and too styled are hair
With the right music, roll the red carpet out
Talking to fans will take you all day
With the right music what could go wrong
With the right song, I'll be okay
(Just walk like the normal person)

Gym! Now I am and it couldn't be drearier (come one guys)
I hate gym, every game leads to feeling inferior
it's gram but then I start to hear
The music that playing inside my head
those magic lyrics that go unsaid
I hear that simple melody safe and warm
and then I... transform
With the right music, we're the Broadway show
singing the song from some other age
with the right music, a company starts to grow
None of you have no clue how we fit on the stage
with the right music, we're an awesome hit
everyone dancing under the light
with the right music what can go wrong
with the right song, I'll be alright
I'll be alright

Others speak fun of me
I guess I'm immune
No, it doesn't bother me
'cause if they don't hear my song
I know that someone will sue

I know, that I'm meant to grow up in something grand
I know, that I'll find people after who will understand

I know, the world will finally hear...
That music playing inside my head
those magic lyrics that go unsaid
They'll hear that simple melody safe and warm
and the world... will transform

With the right music, I hear the world rejoice
Kinda like every day is the best
With the right music, everyone hears my voice

Kinda sweet, with it's beat, you just can't be depressed
with the right music, everything's possible
like the world /?/
with the right music, it's like I belong
with the right music, I'm not alone
