

Nomy, Fuck you all good night

faces stand in front of me
laughting , making fun out of me.
this is my last song
thank u all, this is about ..noone
fuck u all good night, ill be just fine
Can someone kill the light, it just won't shine
now i know whats wrong
yet everyone is gone
all by myself
all alone
i allways wanted to be seened
so where have u been
now im standing here, embrace me
you couldnt see in my head, youve never been there
now im living on what is wrong
no one els is gonna like my songs
fuck u all good night ill be just fine
yes someone kill their lies with just one shot
fuck u all good night ill be just fine
yes someone kill their lies with just one shot
