

Nomy, Let the sun die

We live in sorrow, lets die tomorrow
So let the sun die, so let the sun....
So scared of this, my god, I miss
What I could see, we're damned to be
Like saints we act, we're dogs and that's a fact
Lets die for everthing we've done
And now I'm cold as stone
You made me lost, a stone of dust
Lets kill the sun for what we are
And leave me here with god
And I will pay my sins with my own blood
So paint this world in black
No need to carry on
Our god is better off when we are gone
So scared of this, my god what did you miss
In flames we are, this shit has gone too far
We love to hate and now you're out of fate
confused, we stand, a plague will kill this land
We live in sorrow, lets die tomorrow
So let the sun die, so let the sun....
Lets kill the sun for what we are
And leave me here with god
And I will pay my sins with my own blood
So paint this world in black
No need to carry on
Our god is better off when we are gone
Lets kill the sun for what we are
And leave me here with god
And I will pay my sins with my own blood
So paint this world in black
No need to carry on
Our god is better off when we are gone
