

Norma Jean, Just Like I Knew

Never have ever in all my life never have I felt like this
You came along and changed my life with just one little kiss with just one little kiss
Instantly I fell for you just like I knew I would
Desperately I'm a holdin' on just like I know I should
Never have ever in all my life never have had it so good
You came along and filled my life just like I knew you would just like I knew you would
(guitar)
Never have ever in all my life never have I felt like this
You came along and changed my life with just one little kiss with just one little kiss
Fatherly you fell for me just like I hoped you would
And constantly I cling to you just like I know I should
Never have ever in all my life...
Kust like I know I should just like I know I should
