

Norma Jean, Yesterday All Day Long Today

When I awoke this morning I looked around and you were back
My mind's finally done it it's gone and jumped the track
And all day long it's been this way it's been yesterday all day long today
It's been yesterday all day long today you love me in that same familiar way
But I know you only make believe my mind's gonna stray
Cause it's been yesterday all day long today
[guitar]
My day's been complete you've been here with me again
And I don't think I'll ever wantin' my mind to mend
I'm praying that tomorrow we'll please to stay away
Cause it's been yesterday all day long today
It's been yesterday...
