

# Norther, Norther

Deep inside you got nothing left  
You're just a fallen star  
Betrayed by dream in vain  
Before you're dead you must be  
Released by the victorious one  
Take your last breath and cry before I unleash hell  
We have the cure for our endless war  
And it's the last night before the darkness and light  
Blackhearted midnight walker is going nowhere  
Beneath the stars he wonders... is he hollow?

Nightfall  
The darkest time arriving  
Look into the mirror of madness  
Drown in the chasm of sadness  
Day zero never comes  
Thorn in my spine awaiting salvation  
For the day of redemption

Death unlimited is coming your way you got nothing to say  
Hellhole is gonna tear you apart  
Don't you know that everything is an end or maybe not  
'cause you don't know shit

[Solo: P. Lindroos]
